Bibash Dahal

Full Stack Developer
Kathmandu, Nepal | +977-9842532066 | bibash98425@gmail.com | bibashdahal.com.np
github.com/BibashDahal1 | linkedin.com/in/bibash-dahal123

Professional Summary

Full Stack Developer with hands-on experience building scalable web applications and AI-powered platforms. Proficient in the React ecosystem (React.js, Next.js, React Native), Flutter, Node.js, Django, and MongoDB/PostgreSQL. Proven track record delivering production-level systems, including a full-stack marketplace and auction platform for artists featuring a custom-built immersive 3D virtual exhibition experience, and an OCR-based Nepali text recognition tool.

Technical Skills

Frontend: React.js, Next.js, Redux, Three.js / React Three Fiber, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+), TypeScript
Mobile: React Native, Flutter, Dart
Backend: Node.js, Express.js, Django, Django REST Framework, Django Channels, REST APIs, WebSockets, JWT
Databases & Infra: MongoDB, PostgreSQL, SQL, Redis, Neon cloud DB
Tools & Other: Git, GitHub, Postman, Render, Vercel, Cloudinary

Experience

Full Stack Developer Jr 8 Months
IOXET Labs *Nepal*

- Built and maintained production-grade React.js web applications in an Agile team environment.
- Developed a reusable component library and responsive UI patterns adopted across multiple projects.
- Integrated third-party REST APIs and collaborated closely with backend engineers on feature delivery.
- Completed multiple higher-stakes projects as a full-time employee, gaining production experience.

Featured Projects

Interactive 3D Portfolio bibashdahal.com.np
Next.js, React Three Fiber, Three.js, TypeScript, Tailwind CSS, Cloudinary

- Built a story-driven 3D portfolio: visitors enter a reception lobby, are greeted by name, and are guided to a skills office or a project gallery.
- Created skill and project holograms, with room layouts generated from data files so adding a project needs no layout changes.
- Added keyboard and mouse controls on desktop, touch controls on phones, a quality switch, and a custom animated SVG loading screen.
- Streamed videos and images from Cloudinary; deployed on Vercel with a custom `.com.np` domain.

PlannedIt – Activity Planning Mobile App GitHub
Flutter, Dart, Django REST Framework, PostgreSQL, JWT, WebSockets

- Built a location-based platform where users create activities with a place, date, time, and participant requirements, such as finding more players for a futsal match.
- Implemented activity discovery, join requests, group chat, and participant coordination to help people plan and connect.
- Implemented Team Management and Cost Management in the dashboard with Coordinated Management
- Developed the backend with Django REST Framework, PostgreSQL, and JWT authentication.
- Added safety-focused features so hosts can review join requests before accepting participants.

Artigo (Kalaa Ghar) – Art Marketplace & Virtual Exhibition arti-go.vercel.app
React.js, Three.js, Django, Redis, WebSockets

- Built a full-stack platform enabling artists to sell artworks, digital art, and photography, with live auction and bidding functionality.
- Designed the unique selling point: an immersive 3D virtual exhibition where artists show work in customizable rooms (color, size, music) and visitors buy tickets to explore online.
- Engineered the backend with Python/Django, using Redis and WebSockets for real-time auction bidding and live exhibition interactions.
- Built the React.js frontend, integrating a Three.js-based 3D gallery alongside the core marketplace UI.

AI Nepali Image Text Recognition & Translation (Aksar)
Final Year Project – OCR, image processing, translation APIs

- Built an OCR system to extract and translate Nepali text from images using a custom image-processing pipeline.
- Delivered as a full-stack web application combining image processing, OCR, and translation APIs.

Education

Imperial College of Engineering, TU Affiliated Nepal
Bachelor of Engineering in Computer Engineering (BCT), Fourth Year Student – Pass Out *2021 – 2026*

Interests

Technical writing • AI systems • Learning new technologies • Open-source software development
