Mobile:	React Native
Backend:	Node.js, Express.js, Django, Django Channels, REST APIs, WebSockets
Databases & Infra:	MongoDB, PostgreSQL, SQL, Redis, Neon cloud Db
Tools & Other:	Git, GitHub, Postman, Render, Vercel, Cloudinary

Experience

IOXET Labs Nepal

Full Stack Developer Jr *8 Months*

- Built and maintained production-grade React.js web applications in an Agile team environment.
- Developed a reusable component library and responsive UI patterns adopted across multiple projects.
- Integrated third-party REST APIs and collaborated closely with backend engineers on feature delivery.
- Completed multiple projects Working as an employee containing higher stakes and experience.

Featured Projects

Kalaa Ghar arti-go.vercel.app

Full-Stack Art Marketplace & Virtual Exhibition Platform

- Built a full-stack platform enabling artists to sell artworks, digital art, and photography, with live auction and bidding functionality.
- Designed and developed the platform's unique selling point: an immersive 3D virtual exhibition where artists showcase their work in virtual rooms, and visitors purchase tickets to explore exhibitions online.
- Engineered the backend with Python/Django, using Redis and WebSockets to power real-time auction bidding and live exhibition interactions.
- Built the frontend with React.js, integrating a Three.js-based 3D gallery experience alongside the core marketplace UI.

AI Nepali Image Text Recognition & Translation *Final Year Project*

- Built an OCR system to extract and translate Nepali text from images using a custom image-processing pipeline.
- Delivered as a full-stack web application combining image processing, OCR, and translation APIs.

Education

Janakpur Engineering College Nepal
Bachelor of Engineering in Computer Engineering (BCT) *2021 – Present*
Fourth Year Student – Pass Out

Interests

Technical writing • AI systems • Learning new technologies • Open-source software development
